Acidi-pHlow™

Acidifying Penetrant

Where others only acidify...

Acidi-pHlow™ goes beyond...

Acidi-pHlow is a blend of AQUA-AID® soil wetting agents combined with a unique blend of acidifying agents. Acidi-pHlow is designed to enhance the penetration and infiltration of applied water through irrigation systems with the added benefit of reducing the negative effects of high bicarbonate levels. Acidi-pHlow is compatible with all conventional irrigation systems or conventional ground spray equipment. Follow instructions and technical information from equipment manufacturers. Acidi-pHlow will not harm turfgrass when used according to label.

- Improves soil and irrigation water quality
- Increases water infiltration and penetration
- Lowers bicarbonates and sodium
- Increases soil moisture uniformity
- Improves chelation of unavailable nutrients
- Lowers pH resulting from poor water quality
- Improves drainage
- Aids in the reduction of disease pressure and turf stress
- Reduces run off and evaporation of fertility treatments
- Improved nutrient efficiency
- Softens seed coatings for improved germination

COMPOSITION

Acidi-pHlow is a non-toxic, non-ionic, non-flammable, non-corrosive and biodegradable formulation of wetting agents and acidifying agents.

Active Ingredients:

- 17% Non-ionic polyols
- 6.5% Hydrochloric acid (corrosion inhibited)
- 6.5% Phosphoric acid (corrosion inhibited)

Acidi-pHlow is available in 55, 30 and 2.5 gallon recyclable containers.*

*Check with your distributor for availability.

APPLICATION RATES

Inject 1 to 2 quarts per acre (3 to 5 L/ha) through the irrigation system monthly or as needed.

Tank mix 0.75 to 1.5 ounces per 1000 ft² in 2 gallons of water (3 to 5 L/ha) monthly or as needed.

Overseeding: Apply 2 quarts per acre (5 L/ha) one week prior to overseeding. Immediately follow overseeding with a second application at 2 quarts per acre (5 L/ha).

A jar test should be performed prior to mixing. DO NOT combine Acidi-pHlow in the spray tank with pesticides or fertilizers unless prior use has shown the combination physically compatible, effective and non-injurious under local conditions.
